

Education

Malaviya National Institute of Technology, Jaipur
B.Tech. in Computer Science and Engineering

2019 – 2023
CGPA: 7.11/10.0

Skills

Programming: C++, Python, SQL, JavaScript, HTML, CSS

Databases: MySQL, Vector Database, MongoDB

AI / LLM: LangChain, LangGraph, LangSmith, Prompt Engineering, RAG, Agentic AI

Backend & APIs: Django, Django REST Framework, , REST APIs, Fast API

Cloud & DevOps: Docker, CI/CD, AWS (Basics), Azure (Basics), Cloud Fundamentals

Miscellaneous: Git, Linux, Streamlit, Microservices, Apache Kafka

Experience

Tata Motors Ltd.(Digital.AI Lab)

July 2023 – Present

Software Development Engineer

- Developed Python automation solutions, ETL pipelines, and Django-based web applications for enterprise workflow automation, integrating data from multiple systems and delivering scalable business applications for internal stakeholders.
- Built and scaled AI-powered automation solutions processing 10,000+ emails per day by leveraging Large Language Models (LLMs), advanced prompt engineering, guardrail mechanisms, PII detection/redaction, and structured output generation to ensure secure and reliable responses.
- Designed and implemented Retrieval-Augmented Generation (RAG) based conversational AI assistants using LangChain, vector databases, embeddings, and enterprise knowledge repositories, enabling natural language access to HR policies and organizational knowledge while significantly reducing manual support effort.
- Architected and deployed enterprise-grade Generative AI applications using LangChain, LangGraph, LangSmith, and Large Language Models (LLMs), owning the complete lifecycle from requirement gathering and solution design to cloud deployment, monitoring, evaluation, and production support on AWS.
- Currently developing Agentic AI workflows using LangGraph, MCP (Model Context Protocol), multi-agent architectures, tool calling, and SAP S/4HANA integrations to automate complex business processes through real-time enterprise data retrieval and intelligent decision-making.

Projects

Lakshya – UPSC Preparation Platform

[GitHub]

- Personalized UPSC mock tests with AI-powered answer evaluation and performance analytics.
- Integrated real-time current affairs tracking and gamified learning experience for aspirants.
- Tech Stack: Python, Streamlit, OpenAI, LangChain, LangGraph, LangSmith

Vaani AI – Real-Time Voice Assistant

[GitHub]

- Stateless real-time voice assistant with speech transcription and AI-generated responses.
- Seamless integration with OpenAI for natural language processing and voice generation.
- Tech Stack: Python, Streamlit, LangChain, LangGraph, LangSmith, OpenAI

Mithila Medical – Medical Store Management System

[GitHub]

- Full-stack medical store management with AI-powered inventory and order processing.
- Intelligent chatbot interface for customer medicine search, order placement, and delivery tracking.
- Tech Stack: Python, Streamlit, MySQL, LangChain, LangGraph, LangSmith, OpenAI

Achievements

- Awarded **Gold Award for Owner's Mindset** at Tata Motors for demonstrating strong ownership, accountability, and impact on critical deliverables.
- Solved **586+ Data Structures and Algorithms problems** on LeetCode (Top 1% globally).
